Statewide Park Program – Round One

City of Compton

\$2,788,163

Greenleaf Parkway

This project will create the new Greenleaf Parkway Project in the City of Compton through development of 6 acres, and construction of a new walking trail, gathering area, playground, educational kiosk, and landscaping.

Through community based planning meetings, youth, seniors, and families selected these features. Additional design ideas from residents to be included in the project are:

- Spread a variety of recreational features throughout the park. Use equipment with no sharp edges, and use a rubberized walking/running surface.
- Install artwork created by local school children and youth, have colorful exercise stations, include city history plates or plaques, and picturesque native plants.

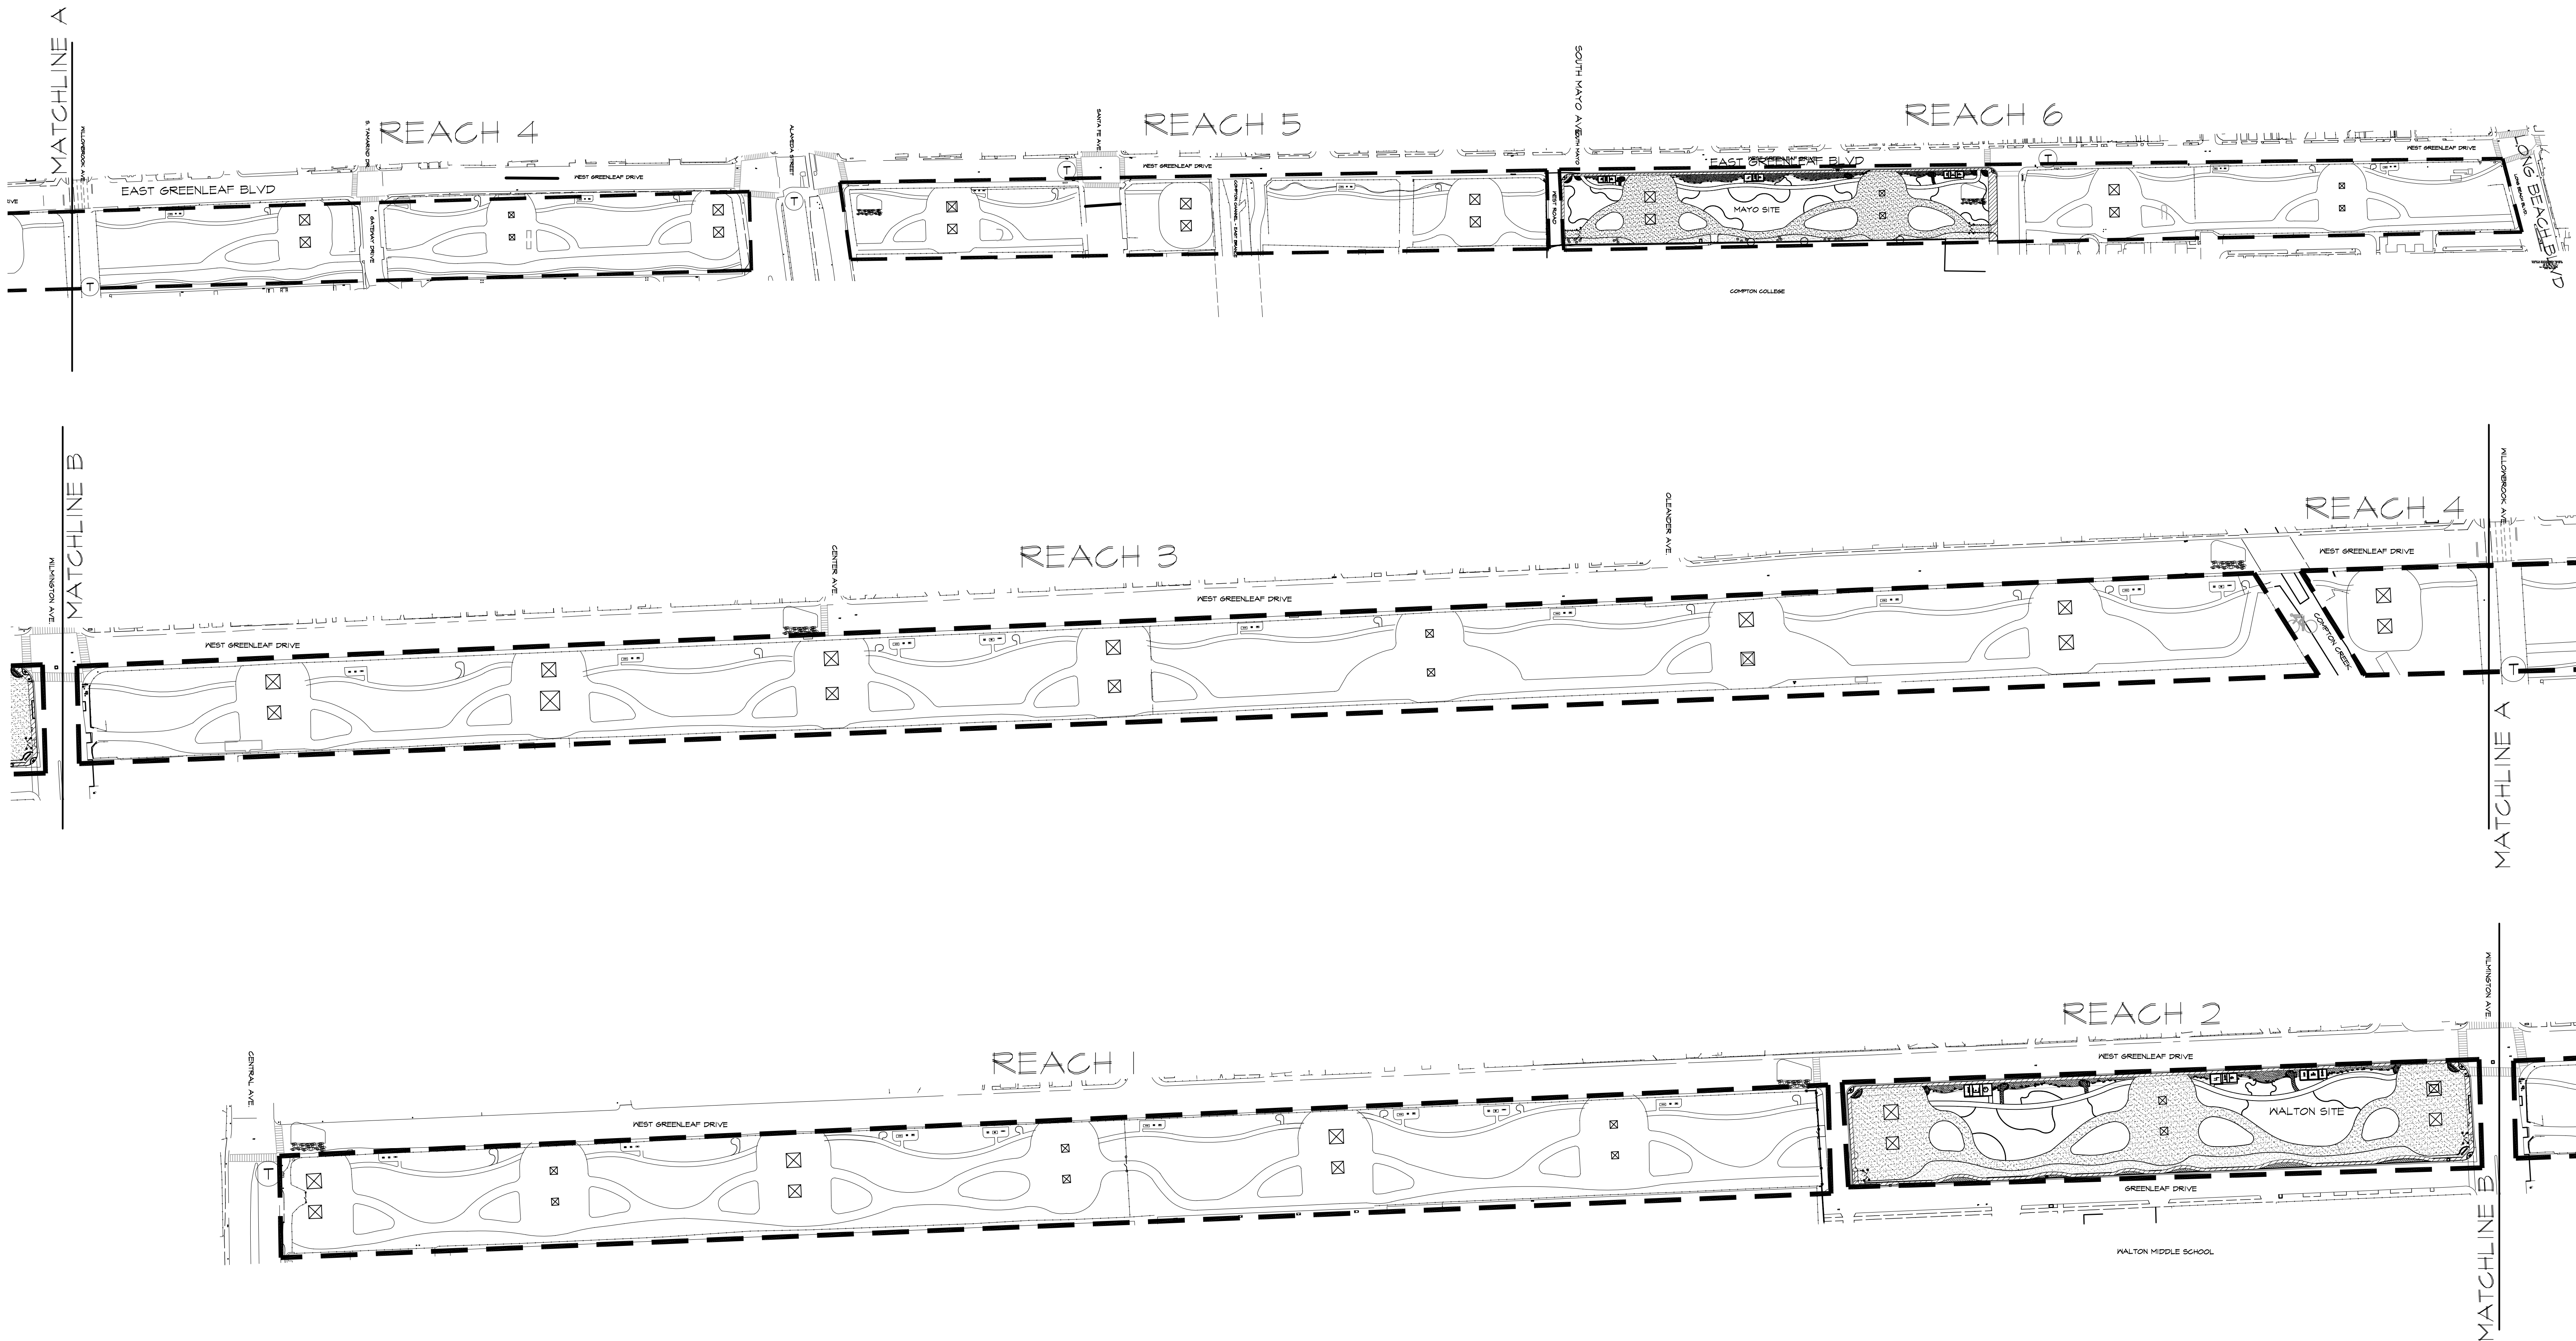

The project will include these sustainable techniques:

- Use Cal-Sense controllers.
- Bio-swales.
- Benches, receptacles, and play apparatuses will be made of recycled plastic.
- Use drought tolerant California native plants.
- Solar lighting, recycled rubber for walking trail. Greenway connects neighborhoods to schools and workplaces.

The park will be open 24 hours every day. No entrance fees will be charged.

reach 1 - reflection

The focus of this reach is reflection and relaxation. The welcoming bench seats and soothing smells of sage will entice visitors to take a break and take in nature. This area might include a rock labyrinth or other type of artwork that encourages reflection.
